PROGRAM BACKGROUND

In the field of teaching, there is a trend toward the integration of technology into the teaching and learning process. With the increasing accessibility of the information technology, it is imperative that at present and in the future teachers and instructors are able to effectively utilize the technology into the teaching processes. The teaching is not limited to only the formal education, rather the corporate for training as well. Therefore, most academic institutions and businesses integrate and implement the utilization of educational technology into their institutions. However, the implementation of technology can be effectively utilized by those who understand the benefits and able to incorporate the technology in an effective way.

The Graduate School of Business realized the importance of developing professionals in the field of education and training who are competent in implementation and utilizing the instructional technology into the teaching process. Thus, the school offers an academic program “M.Ed. in Teaching and Technology” to serve those who need to improve their knowledge as well as further their education.
